Profile

I am a Chartered Engineer and have worked in the information management field, both in the UK and overseas, since the early 1990s.

I first implemented Agresso in 1998 and, since 2001, have specialised in this field via my consulting company, Empiria Ltd.

I have a thorough understanding of technology and business processes and practical experience of many diverse operational environments.

I have the soft skills to operate effectively in the board room, the IT and Finance departments and with end users, system administrators and system suppliers.

I have a proven track record of delivering practical, successful solutions and previous clients willing to support that claim.

I am completely independent of any organisation, other than my own company, and receive no commission or fees from any software supplier or recruitment agency.

I have a small network of trusted, highly skilled and experienced colleagues whom I can call upon to supplement my own efforts as and when necessary.

Major Projects

Some of the more notable projects undertaken in recent years include:

- **Workflow Customisation for a UK University**
  Design and Implementation of an Oracle based solution to customise workflow processes for reearch project management.

- **Fixed Assets Implementation for a UK Housing Group**
  Design and implementation of component accounting for a UK Housing Group with a portfolio of over 25 000 properties

- **New Agresso Implementation for a Multi-National UK PLC**
  Design and implementation of a new Agresso system for a UK PLC with over 100 multi-national subsidiaries and including full data migration of all historical transactions

- **New Agresso Implementation for a National UK Retail Company**
  Design and implementation of external interfaces, reporting templates, and historical data-load for a new Agresso implementation. Successful go-live within 6 month deadline.

- **Agresso Roll Out to an Overseas Subsidiary of a UK Engineering Company**
  Data-loading, interface design, configuration and testing for a fast-track, high-profile implementation of a new Canadian acquisition within a live UK system. (150 new users within a 1200 user system).

- **System Integration for a UK Engineering Company**
  Successful integration of Agresso and a document management system to provide tendering and specification functionality (1000 user system)

- **Roll Out of a Standardised Configuration to all Subsidiaries of a UK Financial PLC**
  Design and implementation of a standardised configuration across a multi-country, multi-company operation (approx. 100 subsidiary companies)

- **Implementation of Project Based Accounting for a UK Software PLC**
  Design and damplementation of the addition of project accounting to an existing multi-country operational system

- **Bespoke Interface Design for a UK Higher Education Establishment**
  Design and implementation of an interface between Agresso and a student record system

Knowledge, Experience and Skills

Technology	Agresso, ARC, ActiveReports, Excelerator, ARW, ACT
	Oracle, MS SQL Server, Postgresql, MySQL
	Ruby, Rails, Python, Django
	Powershell, Bash
Sectors	Professional Services, Retail, Finance, Higher Education, NHS Trusts, National and Local Government, Charities
Project Types	System Review, Selection, Implementation, Configuration, Testing, Troubleshooting, Upgrading, Interfacing, Supporting, Reporting

Employment History

2001 – Current **Owner and Director**, Empiria Ltd
In March 2001, along with two colleagues, I left Eutech to form my own Agresso consulting company, Empiria Ltd.

1998 – 2001 **Agresso System Manager**, Eutech Ltd
In 1998, ICI decided to sell Eutech and I became the lead engineer on a project to implement Agresso. I then became the manager of that system and led its maintenance, development and support.

1994 – 1998 **Technology Project Manager**, Eutech Ltd
Eutech was a wholly owned subsidiary of ICI PLC which provided engineering consultancy services to the process industries.
I joined at its inception in a role providing technical leadership of collaborative R&D projects between ICI PLC and other EU organisations. I particularly specialised in the innovative design and use of relational databases.

1990 – 1994 **Project Engineer**, ICI PLC
I joined ICI as a graduate engineer and worked on a variety of engineering projects for ICI businesses in the UK.

Education and Qualifications

1995 **CEng MIET** Chartered Engineer, Member of the Institution of Engineering Technology (www.theiet.org Formerly the Institution of Electrical Engineering)

1990 **BEng (Hons)** Engineering Science and Technology (University of Loughborough)

Interests and Hobbies

I am a founding Trustee of the UK Python Association and a one of the organisers of PyCon UK - the largest UK conference for users of the Python programming language.
